Ashley Poole

**PATIENT DATABASE** .....18,000

### STUDY EXPERIENCE

Phase I/Ib.....25%

Phase II/III.....75%

**TOTAL**.....215

### STUDY INDICATIONS

Addiction  
ADHD  
Alzheimer's Disease  
Bipolar Disorder  
Complex Regional Pain Syndrome  
Depression  
Diabetes  
Essential Tremor  
GERD  
Hepatitis C  
Opioid Use Disorder  
Schizophrenia  
Sleep Disorders  
Smoking

### PEDIATRIC/ADOLESCENT INDICATIONS

ADHD  
Bipolar Disorder  
Depression  
Schizophrenia

**George Konis, M.D.**, is board certified in Family Medicine and Pain and Addiction. As Principal Investigator and Medical Director, he has participated in more than 110 clinical trials with challenging populations in psychiatric indications (schizophrenia, depression, mania, anxiety), cardiology, gastrointestinal disorders, pain, addiction and general medicine. He is dedicated and committed to sponsors in the success of the execution and completion of all trials.

**Jim G. Aukstuolis, M.D.**, is board certified in Adult and Child Psychiatry. Dr. Aukstuolis has served as Principal Investigator or Sub-Investigator on more than 100 trials for adult and pediatric/adolescent populations.

## WOODLAND INTERNATIONAL RESEARCH GROUP

With 80-plus years of combined research experience, Woodland International Research Group has expanded its initial focus in adults and pediatric research studies to include studies in other therapeutic areas. Woodland International Research Group proudly demonstrates leadership in the medical community by offering research to rural and urban areas of Arkansas, as well as surrounding areas in Mississippi, Louisiana, Texas, Oklahoma and Tennessee. Since opening its doors, it has become a leader in the field of clinical research, having successfully completed more than 200 studies and becoming the top enroller on numerous programs. Study assignment is based on the specific medical interests and qualifications of each physician. Both investigators collaborate on their research programs serving as sub-investigators on each other's trials.

**FACILITY/CAPABILITES**

Woodland International Research Group is a 12,000-square-foot, 50-inpatient bed research facility designed specifically for the comfort and safety of subjects participating in its clinical trials. The clinical research unit is divided into three clinical areas: an 18-bed private room unit designed to provide privacy and comfort during off PK days, a 16-bed open acute care ward for subjects requiring constant monitoring, and a separate three-room unit with two semi-private beds in each room. All units are equipped with emergency care systems, with nursing stations on each unit which allows visibility to all patients permitting study staff to closely monitor patients. The site has partnered with vendors to provide PET, MRI and CSF sampling capabilities, and utilizes a central IRB for all regulatory submissions. Woodland International Research Group is located approximately five miles from St. Vincent Infirmiry Medical Center, and less than one mile from the Arkansas Heart Hospital for emergency care.

Woodland International Research Group recently completed an expansion to include a new 16-bed clinical pharmacology unit. The unit is designed to meet the increased demand for private-based, inpatient facilities devoted to the conduct of complex clinical trials in the pediatric, adolescent and elderly patient populations. The new unit is designed to ensure the best possible care and comfort of these patients, incorporating state-of-the-art technology including bedside TVs, video games, and a large recreation area, as well as a basketball gym. The site also has a dedicated, controlled and secured outdoor smoking space.
