CBH HEALTH

Gaithersburg, MD

INVESTIGATOR

Robert E. Litman, M.D.
Khaled Khalafallah, M.D.

**PATIENT DATABASE =
2,750**

STUDY EXPERIENCE

Phase I/IIb	42
Phase II/III	190
Total	232

STUDY INDICATIONS

- Schizophrenia (Stable and Acute)
- Bipolar
- Depression
- Anxiety Disorder
- Alzheimer’s Disease
- Type 2 Diabetes

STAFFING

- Sub-Investigators
- Clinical Research Coordinators
- Raters
- Recruitment Staff
- Registered Nurses
- Regulatory Staff

Robert E. Litman, M.D., Medical Director and Principal Investigator at CBH Health, developed his interest in the treatment of Schizophrenia at Massachusetts General Hospital, where he completed his residency in Psychiatry. Shortly thereafter, he joined the Experimental Therapeutics Branch, National Institute of Mental Health, NIH, as a Senior Staff Fellow. After leaving the NIH, he formed his own clinical trials research organization. Since then he has conducted over 200 Phase I-IV clinical trials and has participated in many of the important advances in pharmacotherapy of Schizophrenia and other brain disorders. He serves as a consultant in psychopharmacology to many area hospitals, has over 30 academic publications, and speaks about new advances in the field of psychopharmacology and drug development for psychiatric illness. Dr. Litman is currently an Associate Professor of Psychiatry at Georgetown University Medical School and a Fellow and Diplomate of the American Board of Psychiatry and Neurology and Diplomate with added qualifications in Geriatric Psychiatry.

Khaled Khalafallah, M.D., is a board-certified Psychiatrist who serves as a Principal Investigator at CBH Health. He received his medical degree at the Al-Azhar University Medical school in Cairo, Egypt in 1981, and completed his medical internship and psychiatric residency at Howard University Hospital in Washington, D.C. in 1999. Dr. Khalafallah has conducted Phase I-IV clinical trials in Schizophrenia, Bipolar and Alzheimer’s disease.

FACILITY / CAPABILITIES

CBH Health has moved into its new 20,000-square-foot facility in Gaithersburg, Maryland. It consists of a secure 20-bed inpatient clinical research unit, and an outpatient unit with designated bed ward area. Rooms are designated for cognition testing, equipped with WiFi and cameras. There is also an area for infusions (ketamine) that is used for both research and outpatient services. The building holds recruitment and outpatient assessment teams, administrative offices, research staff offices, monitoring space, and additional exam rooms where outpatient clients are seen for pharmacology management visits. Adjacent to these offices, there is psychiatric rehabilitation program which sees clients that are diagnosed with schizophrenia, depression and bipolar illness.

CBH Health continues its early-phase biomarker collaborations with the University of Maryland/Maryland Psychiatric Research Center (UMD/MPRC).
