WOODLAND INTERNATIONAL RESEARCH GROUP

Little Rock, Arkansas

*For business development
inquiries, please contact
Thievon-Wright Consulting
Group at 908.756.4411.*

Woodland International Research Group, a subsidiary of Evolution Research Group, is an inpatient/outpatient research facility experienced in conducting simple and complex trials in psychiatric and neurological disorders, pain indications, addictions, sleep disorders as well as additional non-CNS indications. Woodland International Research Group proudly demonstrates leadership in the medical community by offering research to rural and urban areas in Arkansas, as well the surrounding areas in Mississippi, Louisiana, Texas, Oklahoma and Tennessee. Woodland International Research Group has successfully completed more than 200 studies, and was the top enroller on numerous programs.

RESEARCH FACILITY

Woodland International Research Group is a 48-bed research facility. The main research unit is divided into three clinical areas, an 18-bed private room unit designed to provide privacy and comfort, a 10-bed open acute care ward, and a separate unit with two semi-private rooms.

A purpose-built, 16-bed CRU was opened adjacent to the main unit, designed specifically for pediatric and adolescent inpatient trials in special populations. The facility incorporates state-of-the-art technology including bedside TVs with video gaming, arts and crafts, gaming tables, an indoor gymnasium, other activities, as well as a secure outdoor fresh air space. Our unit was designed for the comfort of patients and family with two beds per room, which allows caregivers to stay overnight. Our patient retention program includes education and tutoring for school-aged study participants. The staff consists of a board-certified child and adolescent psychiatrist and a board-certified family practitioner also boarded in pain and addiction.

This unit is also being utilized for adult and elderly Phase 1-2a inpatient trials, sleep disorder trials, and more complex studies with smaller cohorts, required serial PK draws, PSG and other specialized procedures allowing separation from the main unit.

WOODLAND INTERNATIONAL RESEARCH GROUP

Woodland International Research Group's recruitment staff utilizes well established recruitment initiatives including community outreach. We also have access to patients from our investigators' private practices and local affiliations. Our site also has a dedicated, controlled and secured outdoor smoking space. Woodland International Research Group is located less than a mile from Arkansas Heart Hospital.

George Konis, M.D., is board certified in Family Medicine and Pain and Addiction. As Principal Investigator and Medical Director, he has participated in more than 110 clinical trials with challenging populations in psychiatric indications (schizophrenia, depression, mania, anxiety), cardiology, gastrointestinal disorders, pain, addiction and general medicine. He is dedicated and committed to sponsors in the success of the execution and completion of all trials.

Jim G. Aukstulis, M.D., is board certified in Adult and Child Psychiatry. Dr. Aukstulis has served as Principal Investigator or Sub-Investigator on more than 100 trials for adult and pediatric/adolescent populations.
