

Evolution Research Group, LLC (ERG) is the largest, independent clinical research site company in the U.S., and the leader in early and late phase CNS study execution. ERG's portfolio of 12 fully owned and operated clinical research units allows clients access to more than 400 beds, 3 surgical centers, state-of-the-art imaging, KOLs in multiple therapeutic specialties, and an affiliate member network of 12 high quality, experienced sites. ERG has a proven track record of executing complex trials in specialized and diverse populations across all age groups. ERG is one of the only site groups that has a pediatric PK unit with the expertise to handle CNS populations.

ERG's consulting division works closely with its established sponsor and CRO clients, as well as many of the emerging, specialty pharma and biotech teams, during the clinical development planning stages. The clinical, operational, recruitment, quality and administration teams work collaboratively with clients to ensure study objectives in a timely fashion.

Although ERG is a fully-integrated platform, it has maintained the local identity of its research sites. Patient engagement is a defining core competency that unites our networks, both portfolio and affiliate members. ERG's outreach to patients results in delivery of high-quality study data, but begins with understanding first hand their unmet medical needs, seeking input on protocol feasibility and providing education and awareness of the risks and benefits of clinical trial participation. By partnering with patients and advocates throughout the development process, ERG improves the quality and conduct of clinical trials for both the sponsors and the trial participants. We are proud to contribute to the delivery of life-changing new medicines in multiple therapeutic areas.

The Evolution Research Group network of Portfolio Sites and Affiliate Sites has access to subjects and research experience with these specialized populations and healthy volunteers:

CNS POPULATIONS

- Psychiatry: Schizophrenia (adult and adolescent), Bipolar Disorder (adult and pediatric/adolescent), Addiction (alcohol, cocaine, nicotine), Opioid Use Disorder, Depressive Disorders (adult and pediatric/adolescent), ADHD (adult and pediatric/adolescent), Anxiety Disorders, Eating Disorders, PTSD, OCD
- Neurology: Alzheimer's Disease, Multiple Sclerosis, Parkinson's Disease, Essential Tremor, Sleep Disorders (insomnia, narcolepsy, RLS, apnea), Tourette's Syndrome (adult and adolescent), Huntington's Disease, Tardive Dyskinesia, Epilepsy, Autism
- Pain: Post-Op Pain (breast augmentation, abdominoplasty, unionectomy, hernia repair, TKA/THA, bariatrics, DFU procedures), PHN, Fibromyalgia, OA, DPN, Gout, CRPS, Headache (Migraine/Tension), CLBP

HEALTHY AND NON-CNS POPULATIONS:

- Healthy Volunteers: First-in-Human, First-to-File, PK/PD, SAD/MAD, DDI, FE, BA/BE, QTc/TQT
- Renal Insufficiency
- Geriatric and Healthy Geriatric
- Tobacco Users
- Smokers
- Vaccine
- Endocrinology: Diabetes, Obesity
- Post-Menopausal
- Sexual Dysfunction Disorders
- Hepatic Impairment: Hepatitis, NASH, CLFD
- Podiatry: DFU, Tinea Pedis, Onychomycosis, Plantar Fasciitis, Morton's Neuroma, Achilles Tendonitis
- Dermatology: Atopic Dermatitis
- Gastrointestinal: GERD (adult and pediatric)
- Respiratory: Asthma (adult and pediatric/adolescent), COPD
- Cardiovascular Disorders: Hypertension, Hypercholesterolemia

“Although ERG is comprised of distinct trial sites, patient engagement is a defining core competency that unites our network.”

— Lori Wright, CEO,
Evolution Research Group

COMING SOON - 2019

Evolution Research Group and
Endeavor Clinical Trials to Open
the First State-of-the-Art,
Stand-Alone Research Facility
with On-Site Surgical Capabilities
in San Antonio

Evolution Research Group Portfolio Sites

Brain Matters Research

800 NW 17th Avenue
Delray Beach, FL 33445

LOCATION 2:

The Kane Center
900 SE Salerno Road
Stuart, FL 34997
